## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-40, drawn to a method for forming a glass run channel (wear resistant composite), classified in class 156, subclass 244.11.
  - II. Claims 41-48, drawn to a glass run channel (wear resistant composite), classified in class 428, subclass 122.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as one where the main body member and/or the abrasion resistant layer are made by a process other than extrusion, such as by molding.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/910,337

Art Unit: 1733

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Election of Group I will require the further Species elections (Species I-III):

Species I directed to the crosslinkable thermoplastic.

Species IA, appears to read on claims 2-1/6 and 16-20, directed to the crosslinkable thermoplastic comprising a moisture crosslinkable polyolefin.

Species IB, appears to read on claims 31-40, directed to the crosslinkable thermoplastic comprising a high ethylene content EPDM rubber.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Species II directed to the contacting step.

Species IIA, appears to read on claims 7, 21, and 33, directed to contacting the abrasion resistant layer with the main body member after partially crosslinking the crosslinkable thermoplastic of the abrasion resistant layer.

Species IIB, appears to read on claims 8, 9, 22, 23, and 34, directed to contacting the abrasion resistant layer with the main body member before partially crosslinking the crosslinkable thermoplastic of the abrasion resistant layer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Species III directed to the curing step.

Art Unit: 1733

Species IIIA, appears to read on claim 24, directed to contacting the abrasion resistant layer with the main body member after partially curing the main body member.

Species IIIB, appears to read on claims 1-14, 25, and 35, directed to contacting the abrasion resistant layer with the main body member before partially curing the main body member.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 15 and 26-30 are generic to Species I-III.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct. applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1733

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Timothy Nauman on 8/19/02 a provisional 6. election was made with traverse to prosecute the invention of Group I, claims 1-40. Affirmation of this election must be made by applicant in replying to this Office action. Claims 41-48 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. However, as noted above a further Species election is required. A telephone call was made to Mr. Timothy Nauman on 1/17/03 but did not result in a Species election being made. It is noted that upon the indication of allowable subject matter, rejoinder will be considered depending upon the basis thereof.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1733

## Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L. Goff whose telephone number is 703-305-7481. The examiner can normally be reached on M-Th (8 - 5) and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on 703-308-2058. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
